HIGH TEMPERATURE UNDER INSULATION
ANTI-CORROSION COATING (NO.1567)

**Specification Data**

**Type**
2 pack - Amine-cured silicon epoxy to provide a corrosion resistant barrier when used for steam purge pipe or thermal cycling environment. It has excellent ability for anti-corrosion in heavy duty environment. 1567 must be finished by 1569 for topcoat when used for outdoor condition.

**Uses**
Used for carbon steel and stainless steel to corrosion prevention under 300°C (572°F).

**Characteristics**
- Excellent heat resistance, can withstand heat to 300°C (572°F).
- Excellent anti-corrosion for thermal shocking structures.
- Excellent resistance to chemicals.
- It can be sprayed to the carbon steel, galvanized steel and stainless after its surface has been treated.
- Good moisture resistance for the condition of hot and cold cycle, and paint film with water repellency, suitable for CUI environment.

**Color**
Black, Silver-Gray

**Finish**
Semi-Gloss

**Primer**
Self Priming

**Dry Temperature Resistance**
Continuous: 300°C (572°F)

**VOC values**
395 g/L ; Use SP-12 thinner to thin up 5% (433 g/L).

**Volume Solids**
Above 60%

**Theoretical Coverage**
22.7 m²/Gal 6.0 m²/L 4.3 m²/Kg (DFT :100 microns)

**Dry Film Thickness**
100~125 microns per coat

**Subsequent Coats**
No.1569 Heat-Resisting Top Coating

**Performance Data**

Test reports and additional data available upon written request.

EPDM151567XX V1.1
Certification

- Taiwan Formosa Plastics Thermal Coating Test (SGS Taiwan Ltd.)
- Taiwan Formosa Plastics CUI Specification test (PolyLab LLC)
- Taiwan Formosa Plastics Specification FGES-T-UPA12 (CSI-22 CSP-04 SSP-04 CHP-01 SHP-01)

Application Instruction

- Surface preparation
  **General**
  Remove dirt, dust, oil and all other contaminants that could interfere with adhesion of the coating. Surfaces must be clean and dry. Moisture, grease, sludge, dust, corrosive salt must be thoroughly cleaned from substrate.

  **Steel**
  Surface preparation standards can be used SSPC-SP 10, Sa2 1/2 (ISO 8501-1:2007) or hand rusting to SIS St3. The galvanized or stainless steel must be sand blasted to SIS Sa1 before application. Roughness for structure of carbon steel requires for 45-60 microns, for stainless and galvanized steel surface is above 25 microns.

- Mixing & Thinning
  **Mixing**
  Mix base and hardener according to the mixing ratio and stir thoroughly.
  **Thinning**
  Use Epoxy Thinner (SP-12) to thin up 5-10%.

  **Mixing Ratio**
  Base : Hardener = 92 : 8 (by weight)

  **Pot life**
  4 hours at 77 °F (mixture, 25°C)

- Equipment
  **Spray Application**
  Add thinner to base and stir thoroughly, then add hardener. Wet film should be below 200 microns for one coat spray to avoid sagging. Viscosity may higher while add hardener, please keep stirring for few minutes. The paint film must be cured for 7 days in room temperature before service, It show no cracking heating to 300°C from room temperature directly.

  **Airless Spray**
  Pump ratio : 45:1 or greater
  Tip size : 0.025”~0.029”
  Output PSI : 2500~4000 PSI

  **Brush**
  Application by brush is recommended for small areas only. Multiple coats may be required to achieve specified film thickness.

  **Roller**
  Application by roller is recommended for small areas only. Multiple coats may be required to achieve specified film thickness.

</table>

Industry standards are for substrate temperatures to be 3°C(5°F) above the dew point. The product simply requires the substrate temperature to be above the dew point.

• Cleanup & Safety

Cleanup: Use Epoxy Thinner (SP-12) to clean. In case of spillage, absorb and dispose of in accordance with local applicable regulations.

Safety

Ventilation: Please read and follow all caution statements on this product data sheet and MSDS for this product. Proper ventilation and protective measures must be provided during application and drying to keep solvent vapor concentrations within safe limits and to protect against toxic or oxygen deficient hazards.

• Package, Handling & Storage

Shelf Life: Minimum 1 year under normal conditions.
